Final Group Project Presentation Assessment Rubric

Name(s) of Presenter(s): Christian Ruis, Mark Myers

The purpose of this rubric is for you to be able to evaluate other student group's presentations. For each criteria (row), circle your base answer to the criteria question then add comments addressing the reason(s) behind your response. Then, enter a score corresponding to a grade point for that criteria in the far right hand column.

CRITERIA	DESCRIPTION	ANSWER	COMMENTS	SCORE
A Complete and Correct Model	An accurate, precise and valid model that is adaptable to changes in variables or novel situations. Provides a deeper understanding of the real world data that is modeled	Yes Yes, but ... No, but ... No	Multiple models were used, shows all of these models.	4
Assumptions	Modeling assumptions are clearly stated and thoroughly understood. Distinction between modeling and real world are clearly made.	Yes Yes, but ... No, but ... No	Assumptions were clearly put and described.	4
Graphics	Visually justifies the choice of model, or allows comparison of results or provides clearly understandable results.	Yes Yes, but ... No, but ... No	Results were shown but in a simple table, other graphics throughout the presentation were nice	3
Policy or Model Space Exercise	Model is used to extensively evaluate the effect of changing model inputs to see the impact on output variables. Or, this exercise provides insight into policy or action recommendations.	Yes Yes, but ... No, but ... No		4
Communicate Analysis Effectively	The project presentation is highly effective in facilitating understanding about the issues of the real world problem.	Yes Yes, but ... No, but ... No	Objective, assumption, model, how model will be used, why they are used, and results all clearly explained	4
SCORE: A=4.0, B+=3.5, B=3.0, C+=2.5, C=2.0, etc.				1
TOTAL SCORE:				9
